

CALL FOR PAPERS

16th Annual Meeting of the European Society of Veterinary Clinical Ethology – ESVCE

7th Annual Meeting of the European College of Veterinary Behavioural Medicine-Companion Animals ECVBM-CA,

Annual Meeting of the German Society of Veterinary Behavioural Medicine and Therapy – GTVMT

24th to 26th September 2010

Hamburg, Germany

www.behaviourmeeting-hamburg.de

Deadline for submitting abstracts: 21st April 2010

The submission of case reports is especially encouraged

Guidelines for abstract submission

Abstracts based on completed research (qualitative or quantitative), critical reviews or case reports are welcome. There will be three categories of abstract submission

- Long spoken presentations (25 minutes plus 5 minutes discussion) – these should be data based, original scientific research
- Short spoken presentations (10 minutes plus 5 minutes discussion) – these may be case reports, treatment regimes, data based or other material
- Poster presentations – these may be case reports, treatment regimes, data based or other material

The abstract must be in English, can be no longer than **300 words** and should be concise, informative and explicit. Providing a list of topics to be covered, or using statements such as “results will be discussed” or “a new theory will be developed” is **not** appropriate.

All submissions will be reviewed anonymously by at least four (4) independent referees, according to the pre-set criteria including: abstracts having the components required (as listed below), the quality of each component, overall clarity of the abstract, and importance of the research to the field.

Research abstracts must include the following components:

- an introduction (a few sentences introducing the study and its objectives)
- methodology – including a description of the participants (both human and animal), such as number (n), type, age, gender, and species, and a description of the study design, data collection, data analysis and apparatus used
- main results, including, when appropriate, statistical test, significance level and actual test value (e.g., $F(df) = ?$, $p < 0.05$)
- principal conclusions and implications for the field

Critical review abstracts must include the following components:

- an introduction (a clear statement of the purpose of the review)
- key literature references to theory, concepts, evidence or methodology that have been reviewed or re-evaluated
- main findings
- principal conclusions and implications for the field

Case reports abstracts must include the following components:

- an introduction (anamnesis, etiology and general background information regarding the case)
- key literature references to theory, concepts, evidence or methodology that have been used
- diagnosis and therapy
- principal conclusions and implications for the field, if appropriate

Abstract submission instructions

Please use the provided sheet for online submission on www.behaviourmeeting-hamburg.de and follow the instructions there. Please fill in all required fields.

When using uncommon abbreviations, spell out in full when first mentioned, followed by the abbreviation in parentheses. Do not abbreviate in the title of the abstract.

Do not indent for paragraphs but leave a one-line gap between paragraphs.

Tables are not permitted in the abstract. Key references (if appropriate) should be listed in abbreviated form, e.g., Dutton, D. and Williams, C. 2004. *Anthrozoös* 17(1): 210–224

A maximum of two (2) abstracts may be accepted from each presenting (or first) author (e.g., 1 spoken and 1 poster presentation, or 2 posters). Unattended posters are not allowed, although a presenting author may delegate someone else to present a poster on their behalf, if they cannot attend in person.

All abstracts that do not follow presentation guidelines will be rejected.
